- "One Finger" Variable Speed Control
- Curved Casing to Reduce Hair Clogging
- Ergonomically Designed Contour Shape
- Comfort Grip One Hand Operation
- Heavy Duty 16' Cord

#93268

**WAHL** Clipper Corporation Presents

## SWITCHBLADE™

**Wahl Professional Clipper**  
**The all-new way to Be the BEST....**

For years, an entire industry has been faithful to another brand...it is time to make the Switch.

... Because now there is something better. The SWITCHBLADE™ Professional clipper by Wahl has remarkable power, is perfectly balanced, and extremely lightweight.

Our team of design engineers has designed a revolutionary linear blade drive system, which delivers power, speed and performance where you need it. Our team has also provided a solution to replacing the drive finger by incorporating a simple interchangeable drive tip which is easily replaced without taking the clipper apart! Unlike other clippers, the rotary motor has no gears to wear out and has the quality you expect from Wahl. The Variable "one finger" variable speed control accelerates the clipper to the high speed you need to cut through the thick stuff! The curved design of the chrome plated head forces the hair away from the clipper virtually eliminating hair build-up for faster cuts. The smooth rubber grip makes holding the Switchblade™ very comfortable and with a 16 ft. power cord, why would you need an extension cord? The full line of our Competition Series detachable blades compliments the Switchblade™ by Wahl.

Isn't it about time YOU made the SWITCH?

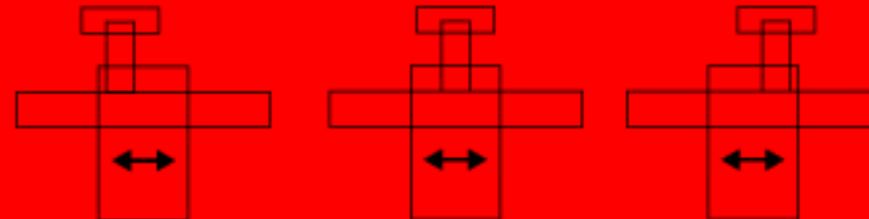

Try a Switchblade™ today!

# WAHL SWITCHBLADE

Wahl Linear Drive System

We not only invented the first clipper in 1919  
We perfected it ten times over.
